PROFESSIONAL SUMMARY

Motivated Software Engineer with over 5+ years of experience in full-stack web development, ERP support, and API integration. Expert in the Laravel ecosystem and Oracle databases, with a proven track record of developing scalable insurance and e-commerce solutions. Highly proficient in **PHP/Laravel** and database optimization, with a focus on building secure, high-availability architectures that streamline business operations.

TECHNICAL SKILLS

- **Languages & Frameworks:** PHP (Laravel, CodeIgniter), C, C++, WordPress
- **Frontend:** JavaScript, jQuery, Bootstrap, HTML5, CSS3
- **Databases:** MySQL, Oracle Database, SQL Optimization
- **Tools & APIs:** Git, RESTful APIs, Bank Assurance Integration, Courier API, Payment Gateways (SSLCommerz, etc.)
- **Specializations:** System Architecture, ERP Troubleshooting, Academic Journal Platforms

PROFESSIONAL EXPERIENCE

City Insurance PLC | *Senior Executive Officer (IT) / Software Engineer* | 2025 – Present

- **Streamlined** internal operational efficiency by architecting a custom workflow and approval system using **Laravel** and **MySQL**.
- **Systematized** motor insurance processing by integrating **Bank Assurance APIs**, reducing manual data entry time by **70%** and ensuring 100% data accuracy between financial institutions.
- **Optimized** Oracle Database performance through advanced SQL tuning, decreasing report generation time for the business team by **8 hours** per week.
- **Engineered** a specialized commission management system that automated financial tracking for over **50+** agents.

QBitTech | *Web Developer* | 2023 – 2025

- Directed the system architecture for multi-tenant web applications and mentored a team of 3 junior developers to improve sprint delivery speed.
- Orchestrated the full SDLC for high-priority projects, ensuring **99.9% uptime** from initial client requirement gathering through to deployment.
- Improved client satisfaction scores by implementing tailored technical solutions that met specific business growth targets.

Onirban Bangladesh Technologies | *Web Developer* | 2022 – 2023

- Expanded the capability of high-traffic e-commerce platforms by integrating **12+** third-party APIs (Courier, Payment, and SMS).
- Restructured database schemas to support an **80% increase** in product inventory and user traffic without compromising site speed.
- Enhanced CMS functionality, allowing non-technical staff to manage content 50% faster than previous systems.

Manohari IT | *Web Developer (Remote)* | 2019 – 2022

- Executed custom web solutions for international clients, prioritizing high-performance backend logic and responsive frontend design.
- Resolved complex legacy bugs for long-term clients, increasing application stability and user retention.

EDUCATION

BSc (Hons) in Computer Science and Engineering *Institute of Science and Technology, Bangladesh* | **CGPA: 2.98**

Higher Secondary Certificate (HSC) *Nazimuddin Govt. College* | **GPA: 5.00/5.00**

Secondary School Certificate (SSC) *United Islamia Govt. High School* | **GPA: 5.00/5.00**

PROJECTS

Face Recognition Based Automated Attendance System | *Academic Project*

- Developed a real-time identification system using image processing techniques to automate attendance tracking.
- Implemented logic to reduce manual entry errors and generate automated reports.

Journal & Corporate Platforms | trivexbd.com | imcjms.com | https://cityinsurance.com.bd

- Built and maintained academic journal platforms with structured content management for peer-reviewed publications.
- Customized frontend/backend features to support thousands of monthly academic readers.

AI Slogan Generator & Advanced Search Plugins

- Developed an AI-based logic tool for automated content generation and a custom WooCommerce plugin to enhance filtering efficiency.

TRAINING & LANGUAGES

- **Training:** Android Development Training (LICT TOP-UP IT Program) | 2017 – 2018
- **Languages:** English (Professional Working Proficiency), Bangla (Native)
